ABOUT US

## 关于我们

# 致力于成为全球领先的软包装方案合作伙伴

Your global leading partner in flexible packaging solutions.

凯利自2002年成立以来，专注于**BOPP，CPP以及镀铝膜**的研发、生产和销售。经过20多年的发展，凯利已经成为全球领先的软包装薄膜制造商之一。公司现拥有凯利、凯威、凯诚和凯利（越南）四大生产基地。多年来凯利一直致力于国内外市场的拓展，公司的业务网络遍布欧洲、美洲、日本、东南亚和非洲等地，产品品质卓越，深受市场信赖。未来，凯利将继续秉持创新精神，致力于成为全球领先的软包装方案合作伙伴。

Since its establishment in 2002, Kinlead has been dedicated to the R&D, production and sales of **BOPP, CPP, and metallized films**. After more than 20 years of development, Kinlead has become one of the leading manufacturers of flexible packaging films globally. The company currently operates four major production bases: Kinlead, Kinwin, Kincess and Kinfilm (Vietnam).

Over the years, Kinlead has been committed to expanding both domestic and international markets, with a business network spanning Europe, Americas, Japan, Southeast Asia, and Africa. With its exceptional product quality, Kinlead has earned widespread market trust.

Looking ahead, Kinlead will continue to uphold its spirit of innovation and strive to become your global leading partner in flexible packaging solutions.

## 凯利Kinlead

- 生产线: 2xBOPP
- 年产能: 7 万吨
- Production Line: 2xBOPP
- Annual Capacity: 70,000 tons

## 凯诚Kincess

- 生产线: 2xBOPP , 2xCPP , 3x镀铝线
- 年产能: 15万吨BOPP
- Production Line: 2xBOPP , 2xCPP , 3xMetallized Lines
- Annual Capacity: 150,000 tons

## 凯威Kinwin

- 生产线: 2xBOPP
- 年产能: 8 万吨
- Production Line: 2xBOPP
- Annual Capacity: 80,000 tons

## 凯利越南Kinfilm

- 生产线: 1xBOPP
- 年产能: 6 万吨
- Production Line: 1xBOPP
- Annual Capacity: 60,000 tons

## 企业产品 Product

BOPP

CPP

Metallized film

### ■ BOPP

广泛用于包装领域

Bopp film finds wide applications in the packaging industries.

### ■ CPP

广泛应用于制袋、复合、蒸煮、镀铝等

Specially designed for bag making, lamination, retort ,metallization, etc.

### ■ METALLIZED FILM

广泛应用于食品、医药、化妆品及其他包装行业

Widely used in food, medicine, cosmetics and other packaging industries.

型号 SN	品名 Product Name	厚度 Thickness(μm)	描述和应用 Description and Application
光膜产品PLAIN FILMS			
PG11	普通印刷制袋膜 General Printing Bag-Making Film	25-80	礼品包装及服装文具袋 Gift packaging, clothing and stationery bags.
PG12	爽滑型制袋膜 Smooth-Type Bag-Making Film	25-50	爽滑低摩擦，应用于对摩擦系数要求低的包装制袋 Smooth and low friction, used for bags requiring a low coefficient of friction.
PG14	低静电型制袋膜 Low-Static Bag-Making Film	25-50	鲜花、面包等对静电要求的物品包装 Packaging for flowers, bread, powders, and other items requiring anti-static properties.
PP11	普通印刷复合膜 General Printing Lamination Film	15-50	广泛应用于各类印刷制品，可与其他材料复合后制袋，如饼干、薯条、零食等食品包装袋 Widely used for various printed products, can be laminated with other materials to make bags, such as for biscuits, chips, and snacks.
PP12	高透明浅网印刷膜 High-Transparency Light Mesh Printing Film	18-50	印刷膜用，尤其用作渐变色的印刷设计 Printing film, especially suitable for gradient color printing designs.
PT11	普通胶带膜 General Adhesive Tape Film	20-80	可应用于各类透明粘胶带的基材 Can be used as a base material for various transparent adhesive tapes.
PT15	超透胶带膜 Super Clear Adhesive Tape Film	25-80	低雾度，超透型透明粘胶带的基材 Low haze,super clear base material for adhesive tapes.
PL21	复合膜用和预涂膜基膜 Base Film for Lamination and Thermal Lamination Film	12-25	用作与书本、酒盒复合，起到提高光泽度和保护纸张的作用 Used in combination with books and wine boxes to enhance gloss and protect paper.
PL13	塑编膜 Woven Plastic Film	15-20	印刷后同编织袋挤出复合，用做米袋，狗粮猫粮袋 Can be laminated to make rice bags, pet food bags after printing.
PLB11 PNB11	环标签和模内标签膜 Wrap-Around Label and In-Mold Label Film	18-50	广泛应用于各类标签膜，如环绕式标签和模内标 Widely used for various label films, such as wrap-around labels and in-mold labels.
PZ06	隔离膜 Isolation Film	25-50	耐热型薄膜，用于电路板和绝缘板制备 Heat-resistant thin film, used for circuit board and insulation board preparation.
PFT11	保护膜 Protective Film	50-80	涂胶后广泛应用于电子产品、光学仪器、玻璃、建材等加工及运输过程保护，电子产品模切排废用途 After coating, widely applied for the protection of electronic products, optical instruments, glass, building materials during processing and transportation, as well as electronic product die-cutting waste discharge.

型号 SN	品名 Product Name	厚度 Thickness(μm)	描述和应用 Description and Application
消光产品MATTE FILMS			
ML11	消光复合膜 Matte Lamination Film	15-25	光膜面印刷后与纸张或其他膜材复合使表层看起来有柔和典雅的效果 Printing on the gloss surface and laminated with paper or BOPP/CPP/PE films to provide matt/paper-look appearance.
ML21	消光预涂基膜 Matte Thermal Lamination Base Film	12-25	预涂eva后，与书本等复合，起到哑光和保护纸张的作用 After EVA extrusion lamination then laminated with paper to get matt effect and protection of the paper.
MD11	双面哑光膜 Double-Side Matte Film	40-50	印刷，模切作电子产品外包装，能够起到保护作用，还可以涂胶做保护膜和不干胶标签的面材，也用于鲜花包装袋 Printing and die-cutting for electronic product packaging, which serves a protective function. Also be coated with adhesive to serve as a protective film and the face material for pressure-sensitive labels. Also use for flower wrapping.
HMZ01	低雾度转移膜 Low-Haze Transfer Film	18-25	低雾度（35%-45%）热转移，适用于pu弹力布、皮革等面料的烫金转移 Low haze(35%-45%), Heat-Transfer/Release, suitable for hot foil transfer on fabrics such as PU stretch fabric, leather and so on.
MZ01	高雾度转移膜 High-Haze Transfer Film	18-25	高雾度（75%-80%），适用于各种家纺类、烫金纸等转移 High haze(75%-80%), Heat-Transfer/Release, Suitable for various home textile transfers and hot stamping paper transfers.
热封产品HEAT SEALABLE FILMS			
HSS11	普通单面热封膜 General Single-Side Heat-Sealing Film	15-50	广泛应用于热封型包装袋，可直接制袋亦可复合后制袋，如食品、口罩等包装袋 Widely used in heat-seal packaging bags, can be used to directly make bags or be laminated before bag-making, such as for food, face masks, and other packaging bags.
HSD11	普通双面热封膜 General Double-Side Heat-Sealing Film	15-50	广泛应用于热封型包装袋，适合立式或卧式包装，及复合制袋 Widely used in heat-seal packaging bags, suitable for vertical or horizontal packaging, and laminated bag-making.
LSD11	低温双面热封膜 Low-Temperature Double-Side Heat-Sealing Film	15-50	105℃起封，适用于各种快速的自动包装机，如饼干、面包等 Initial seals at 105°C, suitable for various fast automatic packaging machines, such as for biscuits, bread, etc.
USD14	超低温双面热封膜 Ultra-Low-Temperature Double-Side Heat-Sealing Film	15-40	95℃起封，广泛应用于热封型包装袋，可直接制袋，可用于垂直包装机和水平包装机，提高包装速度 Initial seals at 95°C, widely used for heat-seal packaging bags, can be used to make bags directly, suitable for vertical and horizontal packaging machines, improving packaging speed.
HSD21A	普通防雾膜 General Anti-Fog Film	20-40	广泛应用于鲜花、生鲜蔬菜、水果、畜肉加工制品，冷冻食品等生鲜食品的展示性包装具有良好的防雾化效果 Widely used for display packaging of fresh flowers, fresh vegetables, fruits, meat products, frozen foods, etc., with excellent anti-fog effect.

型号 SN	品名 Product Name	厚度 Thickness(μm)	描述和应用 Description and Application
CPP&镀铝膜产品CPP&METALLIZED FILMS			
CPP-L11	复合膜 Lamination Film	20-60	广泛用于软包装，常与PET,BOPP等膜复合使用 Widely used in flexible packaging, often laminated with PET, BOPP, and other films.
CPP-L11L	低温复合膜 Low-Temperature Lamination Film	20-60	用于更低温度的热封场合，与PET,BOPP等膜复合用 Suitable for heat sealing at lower temperatures, lamination with PET, BOPP, and other films.
CPP-L11A	复合防雾膜 Anti-Fog Lamination Film	30-50	可与PET,BOPP等膜复合，用于生鲜食品、熟食等包装起到防雾效果 Can be laminated with PET, BOPP, and other films, used for packaging fresh food, cooked food, etc., with an anti-fog effect.
CPP-G111	增韧制袋膜 Toughened Bag-Making Film	25-40	适用于快速自动包装机，韧性大，多适用于寒冷地区， Suitable for fast automatic packaging machines, with high toughness, especially in cold regions.
CPP-G14H	低静电包装膜 Low Static Packaging Film	25-50	低静电，用于鲜花、面包袋包装 Low static, use for flowers, bread, powders, bags.
CPP-D11	纸巾膜 Tissue Paper Packing Film	20-50	适用于各种纸巾的包装，以及其他需要立体包装，双面热封的场合 Suitable for packaging various tissue papers and other items requiring 3D packaging or double-sided heat sealing.
DCPP-M11	CPP镀铝膜 CPP Metalized Film	20-40	CPP镀铝成品膜，与BOPP/PET等复合后适用于各类软包装 CPP metalized film, suitable for various flexible packaging after lamination with BOPP/PET and other films.
DCPP-MH11	高牢度CPP镀铝膜 High Bonding CPP Metalized Film	20-40	CPP镀铝成品膜，铝层牢度高 CPP metalized film, with high aluminum layer adhesion.
DHSD13	BOPP镀铝膜 BOPP Metalized Film	15-40	BOPP镀铝成品膜，可与BOPP/PET等复合 BOPP metalized Film, can be laminated with BOPP/PET and other films.
MPET	PET镀铝膜 PET Metalized Film	12-100	PET镀铝成品膜 PET metalized film.
环保产品ENVIROMENTAL FRIENDLY FILMS			
R**- PG14	再生BOPP膜 Recycled BOPP Film	20-50	BOPP膜添加再生料，消费前（PIR）和消费后(PCR)可选，添加比例20%-70%可选，可开TC证书，适用于非食品包装 BOPP film with recycled resin, both pre-consumer (PIR) and post-consumer (PCR) options available, with a ratio of 20%-70%, TC certificate available, suitable for non-food packaging.
LC**- PG12	生物基BOPP膜 Bio-Based BOPP Film	25-50	含生物基材料，比例4%-70%可选 Contains bio-based materials, with a ratio of 4%-70% available.
CPP- R**-G14H	再生CPP膜 Recycled CPP Film	25-60	CPP膜添加再生料料，消费前（PIR）和消费后(PCR)可选，添加比例20%-97%可选，可开TC证书，适用于非食品包装 CPP film with recycled resin, both pre-consumer (PIR) and post-consumer (PCR) options available, with a ratio of 20%-97%, TC certificate available, suitable for non-food packaging.
